Bachelor's degree in Software Engineering from the Peruvian University of Applied Sciences (UPC).
I consider myself self-taught, responsible, analytical, a team player, and highly ethical.

Experience

Junior BTP Programmer   *2023 - Present*
CSTI Corp.

- Implementation of improvements and new functionalities based on client requirements at the frontend level. The most notable project was for Grupo Maquinarias, where I was responsible for developing the Pre-invoice Approval module on the frontend, utilizing ABAP services. Additionally, I provided solutions for incidents reported by clients in their applications, working at the full-stack level.

Web Developer   *2022 - Present*
Freelance

- Development of websites for individuals and businesses looking to enhance their digital presence through effective web solutions, utilizing modern development practices. Among the most notable projects is the e-commerce website for Chiringuito, which was prepared to be presented as a project to the Ministry of Culture.
